STAINLESS STEEL FAUCETS

Stainless Steel Faucet

Premium Choice

Surface Treatment

Physical treatment is natural natural plating. Need not worry about Coating (Plating, shedding, or Rust) affecting appearance. Being Rust free, their Luccer is maintained throughout his as Bright as New.

Performance

Stainless Steel at high temperatures for BEST. Heat resistance & Oxidation resistance performance from Liquid or class Flastam sensibility. It offers best in class. Thermal Stability Resulting in High Temperature operations. This operating environment is siaite similar to Kitchen orvo ceving a high temperature beit which is breeding ground for bocterts. Clearly, Heat resistant Stainless Steel is boat chake and most Healthy.

Environmental Health

Stainless Steel Foucets: do not contain leadt. It hasit is best in class Aria and Alkali resistance giving NaCorrosion. No-elease of fiee. Thus, ensuring. No polution of Top water, rg a Guareance of safe erocate prems for a healthy body. No worres for your Healthy body.

VS

S

C

Copper / Brass Faucet

Traditional Option

C

Surface Treatment

Surface is finished through electropolating a chromium plating rayer having an average life of 2-0 years if of good quality, resulting in shedding and wear beyond repair, and henca affecting and spliting the appearance lookingDelivery soon

Performance

Heat resistance of Copper / Brass is much lower than Stainless Steel, btut it is oower for Bacteris, elemetic elements to attack on Copper / Brass faucers filters entering into the Water veratment

Environmental Health

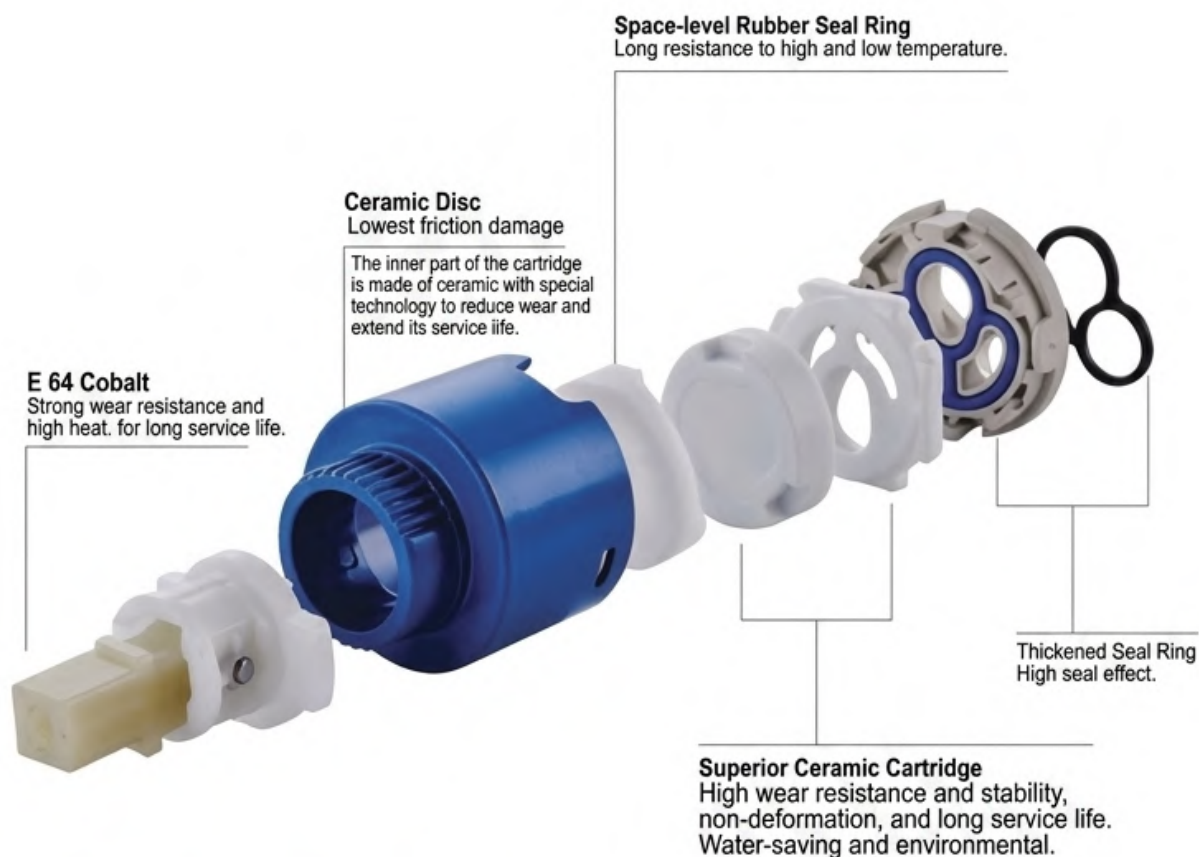

Lead content is L4 - 8% in Copper / Brass faucets. Long term use causes Chemical between between the inner wall and air/weser resulting in formation of base. Copper, Carbonote: CuCOS CuOH1 2 , commenly elosen as Pseudomonos, in Bacterial baseom. Lead materials trent-drinking water. Too the much effecting contaminated was too much contaminated water Reoosing. This Grinkerms and seriously affecting Body's health.

A man is shown from the chest up, smiling and laughing while taking a shower. He is holding his hands up to his face, splashing water. A large rain showerhead is positioned above him, spraying water. The shower is set in a tiled bathroom with a built-in shelf holding soap and shampoo. The overall atmosphere is bright and refreshing.
